

Ignacio Jacobo Pineda Delgado

SECURITY & PRIVACY ENGINEER · DEFENSIVE SECURITY & THREAT INTELLIGENCE

Málaga, Spain (Remote) | pinedadelgadoignacio@gmail.com
ipd02.github.io | [GitHub](#) | [LinkedIn](#)

SUMMARY

Security & Privacy Engineer with a defensive core and a strong software-engineering foundation. Currently protecting a global consumer-app portfolio at Bending Spoons, following cybersecurity R&D at the NICS Lab and a Computer Science degree with a Master's in Cybersecurity. Strongest across security operations, threat detection, incident response, digital forensics, malware analysis and threat intelligence — and equally comfortable building the automation that scales defense.

A consistent top-percentile performer: top of class across the entire Computer Science degree, highest university-entrance score in the programme, and selected into Bending Spoons among the top **0.04%** of ~800,000 applicants worldwide.

EXPERIENCE

Security & Privacy Engineer

Bending Spoons

Remote (Spain)

Oct 2025 – Present

- Detect, triage and respond to security incidents on the SOC on-call rotation, driving each case from alert to containment and root-cause remediation.
- Harden the macOS fleet end to end — enforcing compliance baselines, least-privilege administration and endpoint detection/telemetry (Jamf Pro / Jamf Protect).
- Design and build internal security tooling that automates detection, compliance monitoring and remediation across the organization, cutting manual toil.
- Work daily with cutting-edge AI — integrating frontier LLMs and AI agents into security workflows to automate detection, analysis and response at scale.
- Own organization-wide vulnerability management, coordinating remediation of application, dependency and cloud findings and enforcing secure configuration and credential hygiene.
- Run the company's security-awareness program — security training and phishing simulations — to reduce susceptibility to social-engineering attacks.
- Perform application and privacy security reviews of internal and public-facing systems (including black-box testing), surfacing and closing findings before release.

Cybersecurity R&D Engineer

NICS Lab

Málaga, Spain

Jul 2023 – Sep 2025

- Designed and deployed a virtualized honeynet that detected, captured and analyzed live attacks against smart-grid energy-management infrastructure (GEDERA project), turning attacker behavior into actionable defensive telemetry.
- Reverse-engineered industrial / OT protocols (OCPP, Modbus, MQTT) to uncover vulnerabilities in EV-charging and smart-grid communications.
- Researched attack vectors and automotive security standards (UNECE R155, ISO/SAE 21434) for connected vehicles and designed test architectures for vehicle-security certification (5GVEC project).

Team Member

iGEM 2022 — University of Málaga (StarchSTEM)

Málaga, Spain

Apr – Oct 2022

- Selected member of the University of Málaga's team in iGEM, the world's premier synthetic-biology competition (356 teams, 7,700+ participants across 60+ countries, judged at the Paris Grand Jamboree).
- Collaborated within a large multidisciplinary team on a sustainability-focused synthetic-biology project, owning the team's web presence and the technical communication of its scientific results.

EDUCATION

Master's in Cybersecurity
University of La Rioja (UNIR)

La Rioja, Spain
Nov 2024 – Oct 2025

- Final average **9.37 / 10**. Specialisation in IoT / network security; threat analysis, digital forensics, incident response, malware analysis, cloud security and GDPR compliance.
- Master's thesis: *Ethical hacking methodology in an IoT device*.

Bachelor's in Computer Science Engineering
University of Málaga

Málaga, Spain
Jul 2020 – Jul 2024

- Final grade **9.44 / 10** — **top of the 2020–2024 class** with the highest academic record; 25 courses (156 ECTS) awarded with Distinction.
- Final year project: *Honeynets for the protection of energy management infrastructures* — grade 10 (Distinction).

SKILLS

Defensive Security	Threat Detection & Monitoring, Digital Forensics, Incident Response, Malware Analysis, Threat Intelligence
Offensive & Assessment	Ethical Hacking, Vulnerability Assessment, IoT & Network Security, Honeypot / Deception Deployment
Cloud & Endpoint	Azure (Microsoft Defender, Sentinel), macOS Endpoint Management (Jamf Pro), Identity & Access (1Password)
Programming	Python, Shell, C / C++, Java, JavaScript / TypeScript, C#, R
Standards & Compliance	GDPR, Risk Assessment, ISO/SAE 21434, UNECE R155
Languages	Spanish (Native), English (C2), French (B1)

CERTIFICATIONS

Certified Cyber Security Professional (CCSP) — ISMS Forum	2025
Jamf Certified Endpoint Security Associate (Jamf 170) — Jamf	2026
Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft	2024
C2 Proficiency — Cambridge University Press & Assessment	2020
French B1 — Alliance Française	2018

HONORS & AWARDS

- **Bending Spoons selection (2025)** — hired through one of the technology industry's most selective processes: **286 offers from ~800,000 applicants worldwide (~0.04%)**.
- **Reto Enseña 3.0 Hackathon Winner (2025)** — 1st place in Oracle Spain's machine-learning challenge (Málaga) as part of team NICS Lab from the University of Málaga.
- **Extraordinary Degree Award, University of Málaga** — graduated top of the 2020–2024 class with the highest academic record.
- **Manuel Rusillo Academic Excellence Award (2020)** — highest university-entrance score in Computer Science Engineering.
